

Church installs audio system

We now have a new audio system. Senior Church Steward Bryan Harrison said “We have a number of folk in the congregation who were missing the finer points of the service so we’ve installed an induction loop system in the ceiling and bought two microphones so that everyone can enjoy the service as a whole”.

Other groups who use the building during the week such as the East Leake Community Care Day Centre and the Brownies will also be able to use the system on request. The Day Centre are already using it.

The cost was £2,500 of which £500 was donated by the East Midlands Airport Community Fund as part of their support for local communities. We are grateful for their support.
